

Would you like more of your employees making the right choices when it comes to safety? Would you like to develop a long-term relationship with a company that can enthusiastically service all of your safety and health needs - year after year? Would you like to stretch your safety dollars and get multiple issues addressed for the price of one? Would you like to be able to ask questions at no charge on safety and health issues?

SimplySMART!Safety is an innovative yet practical safety consulting company that always strives to provide you with a greater value than you were expecting!

SMART! Hazard Manager App

SMART!Hazard Manager

- Is an affordable tool that can engage everyone, anywhere, all the time, to be involved in your safety process.
- Is simple to use from any smart phone, iPad, and/or PC.
- Instantly show and measure the safety improvements that have been accomplished in each area, department, and site.
- Establish realistic goals for supervisors, departments, and sites that can only be obtained by actual measurable reduction in hazards in their area.
- No more relying on OSHA Recordables - Dart Rates - Workers' Comp Cost or other rear view mirror indicators!
- Instantly have a key component of a Safety Management System – rather it be VPP, I2P2, ISO, ANSI, or OHSAS . Continuous improvements forever!

Safety & Health Consulting

SimplySMART!Safety is changing the way many companies address safety.

SimplySMART!Safety is an innovative yet practical safety consulting company that always strives to provide you with greater value than you were expecting!

- Conduct high-impact training on topics such as Safety Cultural Change (Behavior Based Safety), Ergonomics, OSHA Compliance (Authorized OSHA 10 & 30 Trainer), Safety Committees, Self Assessments, Supervisor Involvement, and many other options.
- Conduct assessments, address machine guarding issues, review pallet rack safety issues, develop Lockout/Tagout procedures, write Job Safety Analyses (JSAs), or assist with most any of your safety needs.
- We efficiently guide you to dramatic improvements in your safety program!
- We can help bring your program into OSHA compliance AND improve productivity at the same time!

Pallet Rack Safety

Are your racking systems safe?

Do you know how to determine when damaged racking needs to be addressed?

How do you really conduct a practical inspection?

Top indications that your pallet rack storage systems may not be safe :

- You have an area in one of your facilities with some significantly damaged racking.
- There is confusion on what “significantly damaged racking” really means.
- You've had a rack component or product fall within the past year (and you may not have been notified).
- You rely on department supervisors for rack safety and they have not asked you for any assistance in the past year.

***ANY OF THESE INDICATE THAT YOU COULD HAVE A PROBLEM THAT COULD
ULTIMATELY LEAD TO A SERIOUS ACCIDENT!***

Our team of Professional Engineers can assist you!

Lockout/Tagout

Why Choose SimplySMART!Safety?

- SimplySMART!Safety has developed thousands of practical energy control procedures (Lockout/Tagout) for facilities of all types.
- Help ensure that ALL of your employees are protected in any potential situation, including partial lockouts such as not locking out chilled water lines when changing out an HVAC fan motor. We can also address areas of frequent confusion such as minor servicing and adjustments.
- Our team can get all of your equipment-specific procedures rapidly completed in a short time frame.
- Our team understands lockout requirements, your equipment, your maintenance procedures, their needs, your business needs, and how to address the grey areas to minimize confusion. We have experienced maintenance managers as well as Certified Safety Professionals on staff to properly sort out the issues.
- The procedures we develop can greatly improve your safety program and become an effective advertising and management tool to drive safety improvements.
- As we are developing your procedures, we can also provide an assessment of what we observe and include a listing of these hazards into our ***SMART!Hazard Manager App!***
